Powerreports - functional module of the Efficio® system

Area of application

The licence-based Efficio® Powerreports module enables the automated creation and dispatch of PDF reports based on customisable templates in portrait or landscape format. The reports combine tabular and graphical evaluations, can be supplemented with free-text comments and visually customised with logos and titles. Flexible schedules allow reports to be generated periodically and optionally distributed as PDF or ZIP packages to defined recipient groups. Efficio® Powerreports is therefore ideal for the regular, automated preparation and distribution of analysis data.

Requirements

Efficio® system version 5.0 or higher

Licensing and support

For information on licensing and technical support, please contact your representative directly or visit the website.

Berg - die Energieoptimierer®

Key features

- Intuitive report design: Content such as diagrams, tables, text or images can be freely arranged using drag & drop – in portrait or landscape format, as required.
- Efficient use of templates: Flexible page templates allow you to create reports quickly and consistently – with any number of pages.
- Versatile display options: Combine multiple visualisations, tables and analysis comments on a single page for maximum information density.
- Customised design: Integrate your own logos, graphics and images, and design text and table elements in your company's corporate design.
- Professional layout: Design headers and footers with text and images that appear automatically on all pages – for a consistent, high-quality appearance.

Advantages

- Time savings through automated report generation – thanks to templates and drag-and-drop functionality, complex energy reports can be quickly structured and reused – without any manual effort.
- Maximum transparency and clarity – multiple diagrams, tables and comments per page enable comprehensive, data-driven analysis of energy consumption and efficiency measures.
- Customised reporting in corporate design – Your own logos, colours and formats ensure professionally prepared reports that are convincing both internally and externally.
- Consistency and traceability – Uniform headers and footers as well as clearly structured additional information ensure consistent documentation and facilitate comparisons across time periods or locations.
- Automated dispatch possible
